WHY DO LEADING HOSPITALS CHOOSE
RightPatient?

Prevents medical identity theft

Validates patient identities remotely after appointment scheduling and identifies patients at check-in.

Reduces denied claims

Prevents patient identification errors throughout the continuum of care to optimize revenue cycle.

Protects patient data

Access to medical records is locked with biometrics, protecting patients even in the event of a data breach.

Increases patient safety

Enables retrieval of the correct medical record to ensure proper treatment is given based on the patient's medical history.

Prevents duplicate records and overlays

Performs real-time de-duplication during enrollment and accurately identifies patients during encounters.

Enhances patient experience

RightPatient is VIP service for patients. Check-in is quick and easy through our tablet app and patients know they are protected.
